
Environmental Policy

It is the policy at JR Press to respect the environment, and be committed to reducing the overall environmental impact of the company.

We recognise our operations result in emissions to air and water, the generation of waste and consumption of natural resources, and therefore realize the importance of our environmental impact reduction.

In particular we will:

- Ensure our employees, suppliers and customers are aware of our environmental commitment
- Strive to minimize the production of waste and the use of energy
- Reduce and or limit the production of pollutants to water, land and air
- Promote the use of FSC, recyclable and renewable materials and in evaluating our suppliers, avoid using materials that have come from controversial sources such as illegally harvested forests and forests with wood originating from uncertified high conservation areas
- We will continue our investment into new technology that supports our ambitions to provide a process that has as little impact on the environment as possible
- And regularly assess the effects the organization has upon the environment

We are committed to operating our business responsibly and in accordance with all environmental regulations, legislation and approved codes of practice. We will strive to continually reduce our impact on the environment and fulfill our obligations as an environmentally responsible company.
